

XBOT EV - Brand Consistency & Campaign Case Study

Instagram Feed

Instagram Story

Facebook Cover

CONTROLLED BRAND PALETTE

Midnight Navy

Brushed Titanium

Electric Cyan

Graphite Black

Pure White

CAMPAIGN PRINCIPLE

One brand system. Three purpose-built compositions. Every design decision is traceable to the brand guide, platform behavior, or claim-safety requirement.

BRAND CONSISTENCY APPROACH

The three assets use one controlled XBOT EV visual system: Midnight Navy as the base, Electric Cyan as the primary accent, Pure White and Brushed Titanium for readable typography, and Graphite Black for depth. The XBOT EV logo remains prominent, the same blue scooter is treated as the hero product, and the overall tone stays premium and futuristic. The layouts are intentionally different by platform: the Feed prioritizes impact, the Story uses vertical hierarchy and a clear CTA, and the Facebook Cover uses a wide brand-billboard composition. Copy is claim-safe and based on supplied brand attributes rather than unsupported product-performance promises.

Case Study - Why Each Asset Exists

Purpose / Reason / Governance / Organizational Benefit

01 INSTAGRAM FEED

PURPOSE

Purpose: create immediate product impact in a fast-scroll square format.

WHY WE USE IT

Why: the feed is suitable for product awareness, campaign recall, and a reusable promotional post.

GOVERNANCE

Governance: official palette, prominent logo, approved brand attributes, product-first hierarchy, claim-safe wording, 1080 x 1080 output.

ORGANIZATION BENEFIT

Organization benefit: strengthens recognition, creates a reusable campaign asset, and gives marketing a consistent launch template.

02 INSTAGRAM STORY

PURPOSE

Purpose: create a mobile-first, immersive vertical experience with one clear action.

WHY WE USE IT

Why: Stories occupy the full screen, so vertical hierarchy and a strong lower CTA support fast comprehension.

GOVERNANCE

Governance: same brand system and hero product, reduced copy density, mobile safe areas, no unsupported booking or technical claims, 1080 x 1920 output.

ORGANIZATION BENEFIT

Organization benefit: supports mobile reach and story placements while maintaining the same visual identity as the wider campaign.

03 FACEBOOK COVER

PURPOSE

Purpose: create a wide brand billboard that communicates XBOT EV identity at a glance.

WHY WE USE IT

Why: the cover format is wide and shallow, so message and product are deliberately separated to avoid a cramped layout.

GOVERNANCE

Governance: minimal copy, approved brand attributes, wide-safe composition, consistent palette and logo treatment, 1640 x 624 working output.

ORGANIZATION BENEFIT

Organization benefit: improves page professionalism and provides a reusable hero banner for ongoing brand presence.

RESULT

The final set presents one coherent XBOT EV campaign without making unverified performance claims. Each platform has its own composition, but the logo, color system, scooter identity, typography direction, tone, and approved brand vocabulary remain consistent. This approach reduces brand drift, makes future revisions easier, and gives the organization a reusable design system rather than three isolated graphics.
